INDEX TO VOLUME LIX

ACTIVATION of glandular stomach of fowl, 435.

ADOLPH, E. F. The excretion of chloride, urea and water by the human kidneys, 460.

Adrenal feeding, effect of, on thyroid gland, 222.

Adrenalin, action of, on kidney, 184, 191.

——, calorigenic effect of, in dogs, 463.

——, influence of, on metabolism in isolated skeletal muscle, 37.

Afferent impulses, visceral, pathway for, 381.

Alcohol content of blood and urine, 477.

——, ethyl, effect of, on tadpoles, 294.

"All or nothing" principle in vasomotor reflexes, 400.

ALVAREZ, W. C. and L. J. MAHONEY. Effects of the galvanic current on segments of intestine, 431.

——— ———. The myogenic nature of the rhythmic contractions of the intestine, 421.

Ammonia, a causative factor in meat poisoning in Eck-fistula dogs, 459.

Analgesia, drug, a new factor in, 445.

ANDRUS, E. C. and E. P. CARTER. The effect upon the cold-blooded heart of changes in the ionic content of the perfusate. I. Upon the normal mechanism. II. Upon the arrhythmias, 227.

Anoxemia and carbon dioxide, comparison of respiratory and circulatory effects of, 449.

ARMITSTEAD, R. B. See MARTIN and ARMITSTEAD, 37.

ARNOLD, L. See KING and ARNOLD, 97.

BACHMANN, G. The distribution of the vagus nerves to the sino-auricular junction of the mammalian heart, 468.

Bacteria, elective localization of, following various methods of inoculation, 443.

BAKER, W. R. See WIGGERS and BAKER, 454.

BALDWIN, F. M. and B. M. HARRISON. Smooth muscle responses when subjected to alcohols, 453.

BANTING, F. G., C. H. BEST and J. J. R. MACLEOD. The internal secretion of the pancreas, 479.

——. See MILLER and BANTING, 478.

BARBOUR, H. G. and D. S. LEWIS. A new factor in drug analgesia, 445.

—— and E. TOLSTOI. The central heat regulating mechanism, 488.

BARKER, J. L. See MOORE and BARKER, 470.

——. See MOORE, JENKINS and BARKER, 471.

BAROTT, H. G. See LANGWORTHY and BAROTT, 376.

BAUMANN, E. J. See MARINE and BAUMANN, 353, 439.

BEST, C. H. See BANTING, BEST and MACLEOD, 479.

BLACK, E. M., M. HUPPER and J. ROGERS. The effects of adrenal feeding upon the iodin content of the thyroid gland, 222.

BLANCHARD, K. C. See LOEB and BLANCHARD, 488.

Blood flow and oxygen metabolism of the thyroid gland, 446.

—— platelets, a study of, 450.

—— pressure, renal, and urine formation, 144.

Blood pressure variations in portal vein, contour of, 457.
——, studies in the regeneration of, 240.
——, thermal effects accompanying alteration of the O_2 and CO_2 content of, 454.
—— volume changes following water abstinence, 452.
BOOTHBY, W. M. and F. C. MANN. The gasometer method of indirect calorimetry for dogs, 464.
—— and I. SANDIFORD. Calorigenic effect of adrenalin in dogs, 463.
BOURQUIN, H. A study on the permeability of the placenta. I. Permeability to agglutinins, hemolysins, diphtheria antitoxin and diastase, 122.
BROOKS, S. C. The electrical resistance and reactance of suspended unicellular organisms, 474.
BURGE, W. E. The mode of action of physical work, cold weather and cold baths in increasing the oxidative processes, 476.
—— and J. M. LEICHSENRING. An explanation for the increase in oxidation brought about by muscular work, 290.
BYRNE, J. Further studies of paradoxical pupil dilatation following lesions of the afferent paths, 369.
——. Pseudo-paradoxical pupil dilatation following afferent path lesions, 475.

CALORIMETRY, indirect, in dogs, gasometer method of, 464.
CANNON, W. B. and F. R. GRIFFITH. The cardio-accelerator agent produced by hepatic stimulation, 480.
Carbon dioxide, production of, by smooth muscle of sea-anemones, 466.
Cardiac cycle, temperature oscillations during, 254.
Cardio-accelerator agent produced by hepatic stimulation, 480.
CARPENTER, T. M. Metabolism studies with enemata of dextrose and levulose, 440.
CARTER, E. P. See ANDRUS and CARTER, 227.
Catalase content of normal and atrophied muscles, 475.
Cells, free, of serous exudate, origin of, 1.
Cerebellar stimulations, observations on, 478.
Cerebral function in learning, 44.
Circulation, glomerular, in frog's kidney, 489.
Cocaine, effect of, on growth of lupinus alba, 465.
COLLIP, J. B. The activation of the glandular stomach of the fowl, 435.
Conductivity, electrical, of animal tissues under normal and pathological conditions, 458.
Contraction of isolated duodenal segment of albino rat by sodium carbonate, rôle of sodium ions in, 466.
COOMBS, H. C. See PIKE and COOMBS, 472.
CRAIGIE, E. H. The reflex produced by chemical stimulation of the deeper respiratory passages, 346.
CRILE, G. W., H. R. HOSMER and A. F. ROWLAND. The electrical conductivity of animal tissues under normal and pathological conditions, 458.
CUNNINGHAM, R. S. On the origin of the free cells of serous exudates, 1.
CURTISS, A. N. See KNOWLTON, DOOLEY and CURTISS, 446.

DAVIS, L. E. The pathway for visceral afferent impulses within the spinal cord, 381.
DOOLEY, M. S. See KNOWLTON, DOOLEY and CURTISS, 446.
DRAGSTEDT, L. R. The relation of parathyroid tetany to intestinal bacteria, 483.
Duodenum, motility of, 72.
Dyes, penetration of, into living cells, 458.

ELLIS, M. M. Pulse rate and blood pressure responses of men to passive postural changes. II. Under low oxygen, 484.
Energy expenditure in sewing, 376.
ERLANGER, J. See GASSER and ERLANGER, 473.
Erection, inhibition of, by decerebration, 461.
Excretion of chloride, urea and water by human kidneys, 460.

FATIGUE, physical, and susceptibility, 467.
——, relation of the adrenals to, 463.
FEIL, H. and C. J. WIGGERS. Physiological aspects of experiments on mitral regurgitation, 456.
——. See FORWARD and FEIL, 457.
——. See WIGGERS and FEIL, 455.
FORBES, A. See REDFIELD, REDFIELD and FORBES, 203.
FORD, T. H. See SCOTT and FORD, 481.
FORWARD, D. D. and H. FEIL. The contour of the pressure variations in the portal vein, 457.

GASSER, H. S. and J. ERLANGER. The cathode ray oscillograph as a means of recording nerve action currents and induction shocks, 473.
Gastrin and pancreatic secretin, specificity of, 457.
GAULT, C. C. See SCOTT, GAULT and KENNEDY, 471.
GLASER, O. On the increased weight of spermatozoa in egg-secretion, 469.
Glycemia curves in rabbits, alimentary, 481.
GREENE, C. W. and C. H. GREENE. Does the partial pressure of oxygen in arterial blood during progressive anoxemia support the secretory theory? 442.
GREENE, C. H. See GREENE and GREENE, 442.
GRIFFITH, F. R. See CANNON and GRIFFITH, 480.
GUENTHER, A. E. and S. MORGULIS. The catalase content of normal and atrophied muscles, 475.
GULICK, A. The influence of a beriberi diet upon the metabolic rate of the white rat, 483.
GUTHRIE, C. C. Results on an enlarged thyroid gland nine years after obstructing the veins, 447.

HAGGARD, H. W. Thermal effects accompanying alteration of the O_2 and CO_2 content of blood, 454.
HAMMETT, F. S. The rôle of the change in hydrogen-ion concentration in the motor activities of the small intestine, 466.
—— and J. E. NOWREY, JR. The rôle of the sodium ions in the contraction of the isolated duodenal segment of the albino rat by sodium carbonate, 466.
HARRISON, B. M. See BALDWIN and HARRISON, 453.
HARTMAN, F. A. The relation of the adrenals to fatigue, 463.
Heart, beating, heat liberated by, 254.
—— of hibernating animals, 467.
——, turtle, effect of ionic content of perfusate on, 227.
Heat regulating mechanism, central, 488.
—— production, effect of thyroidectomy on, following injury to the suprarenal cortex in rabbits, 439.
HECK, F. J. See WILLIAMSON, HECK and MANN, 487.
HELLER, V. G. See NELSON, LAMB and HELLER, 335.
HENDERSON, Y. Reasons for believing that respiratory X is not C_H, 441.
HENN, S. C. See LUCKHARDT, HENN and PALMER, 457.
Hepatic factor in chloroform and phosphorus poisoning, 487.
HERRICK, C. J. What are viscera? 478.

HILL, R. M. and H. B. LEWIS. The hydrolysis of sucrose in the human stomach, 413.
HOLDER, R. C. See KENNARD, HOLDER and WHITE, 298.
HOSMER, H. R. See CRILE, HOSMER and ROWLAND, 458.
HUPPER, M. See BLACK, HUPPER and ROGERS, 222.
Hydrogen-ion concentration in motor activities of small intestine, rôle of change in, 466.
Hydrolysis of sucrose in the human stomach, 413.

IBARA, Y. See MAST and IBARA, 294. Inheritance and evolution, physiological entities in, 481.
Injury, recovery and death, 443.
Intestinal contractions, rhythmic, myogenic nature of, 421.
—— mucosal motor mechanism, activities of, 97.
—— segments, effects of galvanic current on, 431.
IRWIN, M. The penetration of dyes into living cells, 458.
IVY, A. C., B. H. ORNDOFF and A. JACOBY. Studies on the effects of x-rays upon glandular activity: I. The submaxillary gland, 469.

JACOBS, M. H. Effects of carbon dioxide on protoplasmic viscosity, 451.
JACOBY, A. See IVY, ORNDOFF and JACOBY, 469.
JACOBY, L. A. See MARTIN and JACOBY, 394.
JENCKS, Z. Studies in the regeneration of blood, 240.
JENKINS, L. M. See MOORE, JENKINS and BARKER, 471.
JOSEPH, D. R. Experimental proof of vagus apnea, 491.

KEITH, N. M. Blood volume changes following water abstinence, 452.
KENNARD, D. C., R. C. HOLDER and P. S. WHITE. Poultry fleshing investigations. The utilization of soy bean and corn proteins as affected by suitable mineral supplements, 298.
KENNEDY, R. See SCOTT, GAULT and KENNEDY, 471.
Kidney, perfused, urine formation in, 144, 184, 191.
KING, C. E. and L. ARNOLD. The activities of the intestinal motor mechanism, 97.
KNOWLTON, F. P., M. S. DOOLEY and A. N. CURTISS. Blood flow and oxygen metabolism of the thyroid gland, 446.
KRUSE, T. K. A study of blood platelets, 450.
——. The oxygen capacity of bird's blood, 449.
KUNDE, M. The after-effect of prolonged fasting on the basal metabolic rate, 448.

LAMB, A. R. See NELSON, LAMB and HELLER, 335.
LANGWORTHY, C. F. and H. G. BAROTT. Energy expenditure in sewing, 376.
LASHLEY, K. S. Studies of cerebral function in learning. IV. Vicarious function after destruction of the visual areas, 44.
LAURENS, H. The relative stimulating effect of light of different wavelength in an equal energy spectrum, 462.
LEICHSENRING, J. M. See BURGE and LEICHSENRING, 290.
LEWIS, D. S. See BARBOUR and LEWIS, 445.
LEWIS, H. B. See HILL and LEWIS, 413.
Light of different wave-length in an equal energy spectrum, relative stimulating effect of, 462.
Liver, comparison of methods of ablation of, 486.

Liver insufficiency, chronic, production of, 485.
—— removal, study of fibrinogen following, 487.
—— ——, total, effect of, 484.
—— ——, ——, in lower vertebrates, 486.
Livingston, M. See Macht and Livingston, 465.
Loeb, L. and K. C. Blanchard. The effect of some salts on the experimental amoebocyte tissue near the isoelectric point and after addition of acid and alkali, 488.
Luckhardt, A. B., S. C. Henn and W. L. Palmer. On the specificity of gastrin and pancreatic secretin, 457.

Macht, D. I. and M. Livingston Effect of cocain on the growth of lupinus alba: A contribution to comparative pharmacology of animal and plant tissues, 465.
—— and J. L. Ulrich. Effect of prostatectomy on integration of muscular movements of the white rat, 482.
Macleod, J. J. R. See Banting, Best and Macleod, 479.
Magath, T. B. and F. C. Mann. The effect of total removal of the liver in lower vertebrates, 486.
——. See Mann and Magath, 484, 485, 486.
Mahoney, L. J. See Alvarez and Mahoney, 421, 431.
Mann, F. C. and T. B. Magath. A further study of the effect of total removal of the liver, 484.
—— —— ——. Comparison of methods of ablation of the liver, 486.
—— —— ——. The production of chronic liver insufficiency, 485.
——. See Boothby and Mann, 464.
——. See Magath and Mann, 486.
——. See Williamson and Mann, 487.
——. See Williamson, Heck and Mann, 487.
